

## A Z Library Daf Service Rapido

Rethinking Reference for Academic Libraries: Innovative Developments and Future Trends, containing five sections and fourteen chapters, reviews the current state of reference services in academic libraries with an emphasis on innovative developments and future trends. The main theme that runs through the book is the urgent need for inventive, imaginative, and responsive reference and research services. Philanthropy is everywhere. In 2013, in the United States alone, some \$330 billion was recorded in giving, from large donations by the wealthy all the way down to informal giving circles. We tend to think of philanthropy as unequivocally good, but as the contributors to this book show, philanthropy is also an exercise of power. And like all forms of power, especially in a democratic society, it deserves scrutiny. Yet it rarely has been given serious attention. This book fills that gap, bringing together expert philosophers, sociologists, political scientists, historians, and legal scholars to ask fundamental and pressing questions about philanthropy's role in democratic societies. The contributors balance empirical and normative approaches, exploring both the roles philanthropy has actually played in societies and the roles it should play. They ask a multitude of questions: When is philanthropy good or bad for democracy? How does, and should, philanthropic power interact with expectations of equal citizenship and democratic political voice? What makes the exercise of philanthropic power legitimate? What forms of private activity in the public interest should democracy promote, and what forms should it resist? Examining these and many other topics, the contributors offer a vital assessment of philanthropy at a time when its power to affect public outcomes has never been greater.

During World War II, American women entered the workforce in unprecedented numbers, and many of them relied on federally funded child care programs. At the end of the war, working mothers vigorously protested the termination of child care subsidies. In

"A people's history of the Olympics."—New York Times Book Review A Boston Globe Best Book of the Year A Kirkus Reviews Best Nonfiction Book of the Year The Games is best-selling sportswriter David Goldblatt's sweeping, definitive history of the modern Olympics. Goldblatt brilliantly traces their history from the reinvention of the Games in Athens in 1896 to Rio in 2016, revealing how the Olympics developed into a global colossus and highlighting how they have been buffeted by (and affected by) domestic and international conflicts. Along the way, Goldblatt reveals the origins of beloved Olympic traditions (winners' medals, the torch relay, the eternal flame) and popular events (gymnastics, alpine skiing, the marathon). And he delivers memorable portraits of Olympic icons from Jesse Owens to Nadia Comaneci, the Dream Team to Usain Bolt.

Significant questions about Nazi Germany are examined from the point of view of the public library: Was national socialism an aberration from traditional German values or was it a logical development of those traditions? Did the Nazi state carry through a true revolution or did revolutionary rhetoric merely camouflage a power grab? What relationships existed between local governments and the central government? What role did the party play? The book also provides a detailed analysis of the administrative organization, policies, and programs of German public libraries between 1933 and 1945, treating the subject on its own terms. The Nazi period was dramatic and destructive, yet was a critical phase in the development of German public libraries. To serve the ends of national socialism, the new regime brought an institution adrift in a backwater into the mainstream.

Based on his extensive experience in international librarianship, Peter Johan Lor, South Africa's first National Librarian and a former Secretary General of the IFLA, has written the first comprehensive and systematic overview of international and comparative librarianship. His book provides a conceptual framework and methodological guidelines for the field and covers the full range of international relations among libraries and information services, with particular attention to the international political economy of information, the international diffusion of innovations and policy in library and information services, LIS development and international aid. It concludes with a discussion of the practical relevance and future of international and comparative studies in LIS. U-S-A , U-S-A is a familiar refrain heard in every Olympics, but truly it could be Wis-con-sin! Since pioneering hurdler Alvin Kraenzlein got his start here in the 1890s, the Badger State has nurtured, trained, or schooled more than 400 Olympic athletes in a vast array of sports. Wisconsin's varied landscape and climate accommodate serious athletes whether they compete on ice, on snow, in the water, or on terra firma. We tend to bring a Midwestern work ethic to our endeavors, and our Olympians have often been hailed in the press and in public as being among the most humble and down-to-earth people around. Our state boasts a thriving youth sports culture where many homegrown athletes get their start; others are drawn here by our world-class universities, athletic facilities, and coaching talent. No matter how an athlete comes to Wisconsin, the state becomes part of his or her Olympic story. In Going for Wisconsin Gold, author Jessie Garcia provides insights into the lives of athletes who grew up or spent time in Wisconsin on their journey to the Olympic Games. She shares some of our competitors most captivating tales—from those that have become legend, like Dan Jansen's heartbreaking falls and subsequent magical gold, to unlikely brushes with glory (do you know which Green Bay Packer was almost an Olympic high jumper?). Featuring the athletes' personal stories, many of them told here in detail for the first time, plus pictures from their private collections, Going for Wisconsin Gold provides a new and deeper understanding of the sacrifices, joy, pain, heartbreak, and complete dedication it takes to reach the world's grandest sporting competition.
