The real world of professional ethics in art therapy is, more times than not, a spectrum of shades of gray. In this exceptional new fourth edition, the authors raise questions and provide information related to the many ethical dilemmas art therapists face. Several chapters refer to the Ethical Principles for Art Therapists and Code of Professional Practice of the Art Therapy Credentials Board. Changes that were made to the AATA Ethics Document in 2013 are discussed. Models of how to think through and resolve the difficult ethical problems art therapists encounter during their professional lives are presented. A chapter discussing burnout and compassion fatigue—“costs of caring”— provides an understanding of the responsibility that systems hold in supporting therapists and clients. Within each chapter, there are dilemma-laden vignettes intended to stimulate reflection and discussion. Most chapters include a series of questions pertaining to practical applications aimed at helping to review the material, formulate, and clarify positions on key issues. Also included are suggested artistic tasks intended to help the reader engage with topics in meta-cognitive, kinetic, visual, and sensory methods. Compelling illustrations throughout the text are provided as examples of creative responses to the artistic tasks. In addition, informational topics dealing with ethical violations, rights of artworks, marketing, advertising, and publicity are explored. The importance of multicultural approaches is expanded with the discussion that competence is a baseline for practice as an art therapist. Significant updates were made to the chapter that explores art therapy in the digital age. The appendices contain ethics documents of the British Association of Art Therapists for comparison. This unique book is designed for art therapy students, art therapists, expressive arts therapy professionals, and will be a useful and supplemental textbook for art therapy courses dealing with professional ethics and supervision, art therapy theory and practice.

Most mental health professionals and behavioral scientists enter the field with a strong desire to help others, but clinical practice and research endeavors often involve decision-making in the context of ethical ambiguity. Good intentions are important, but unfortunately, they do not always protect the practitioner and client from breaches in ethical conduct. Academics, researchers, and students also face a range of ethical challenges from the classroom to the laboratory. Now in a new expanded edition, *Ethics in Psychology and the Mental Health Professions*, the most widely read and cited ethics textbook in psychology, has emerged with a broadened scope extending across the mental health and behavioral science fields. The revised volume considers many of the ethical questions and dilemmas that mental health professionals encounter in their everyday practice, research, and teaching. The book has been completely updated and is now also relevant for counselors, marriage and family therapists, social workers, and psychiatrists, and includes the ethics codes of those groups as appendices. Providing both a critical assessment and elucidation of key topics in the APA's guidelines, this comprehensive volume takes a practical approach to ethics and offers constructive means for both preventing problems, recognizing, approaching, and resolving ethical predicaments. Written in a highly readable and accessible style, this new edition retains the key features which have contributed to its popularity, including hundreds of case studies that provide illustrative guidance on a wide variety of topics, including fee setting, advertising for clients, research ethics, sexual attraction, how to confront observed unethical conduct in others, and confidentiality, among others. *Ethics in Psychology and the Mental Health Professions* will be important reading for practitioners and students-in-training. Incorporating the thinking, feeling, and behaving dimensions of human experience, the tenth edition of Corey's best-selling book helps students compare and contrast the therapeutic models expressed in counseling theories. Corey introduces students to the major theories (psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, postmodern, and integrative approaches) and demonstrates how each theory can be applied to two cases (Stan and Gwen). With his trademark style, he shows students how to apply those theories in practice, and helps them learn to integrate the theories into an individualized counseling style. Ethical practice is an essential aspect of counselor training. In order for counselors to competently work with clients, they must be well versed in ethical codes, ethical decision making, and legal issues impacting the profession. *Ethical Decision Making for the 21st Century Counselor* provides the fundamentals of ethical practice, with emphasis on ethical decision making and is structured to facilitate the development of these skills. Authors Donna S. Sheperis, Stacy L. Henning, and Michael M. Kocet move the reader through a developmental process of understanding and applying ethical decision making. Individuals will be able to incorporate ethical practice into their understanding of the counseling process and integrate ethical decision making models into their counseling practice. This unique approach differs from existing texts because of its strong emphasis on practical decision making and focus on understanding the process of applying a standard ethical decision model to any ethical scenario. Students build a foundation in how to evaluate an ethical situation and feel confident that they have applied a set of decision models to reach the best decision.

ACA Ethical Standards Casebook John Wiley & Sons

Issues involving dual relationships in counseling are discussed in this monograph. Dual relationships occur when counselors have another, significantly different, relationship with one of their clients, students, or supervisees. This monograph is intended to be a resource that reflects the current thinking of the counseling profession and that represents the diversity of opinion that exists. The book is organized in four parts: Part I contains two chapters that provide a general introduction and overview of dual relationships. In chapter 1 the issues and areas of concern are defined. In chapter 2 the focus is on sexual dual relationships. The considerable body of existing literature is reviewed and discussed and questions are raised about some "gray areas." The remainder of the monograph focuses primarily on non-sexual dual relationships. In part II (containing chapters 3, 4, and 5) issues in the preparation and supervision of counselor trainees are examined. Part III (containing chapters 6-11) focuses on how dual relationships affect practitioners in various settings and aspects of their work. Issues that confront counselors in private practice, college personnel workers, school counselors, rehabilitation counselors, group counselors, and consultants are discussed. In the single chapter of part IV (chapter 12) key themes are identified, questions are asked to encourage integration and reflection, and a decision-making model is presented. It is noted that dual relationships, especially nonsexual dual relationships, will in all probability continue to be discussed and debated well into the 1990s. (ABL)

This fourth edition of the Ethical Standards Casebook was developed for use in a class in ethics in counseling or in other settings where ethical issues are considered. Section 1 presents the revised American Association for Counseling and Development (AACD) "Ethical Standards" adopted by the Governing Council in March 1988. Section 2 presents each individual ethical standard followed by several incidents intended to illustrate and clarify the meaning of the standard. The incidents vary in their seriousness, ranging from gross unethical conduct to behavior reflecting poor practice or questionable judgment. Section 3 provides a series of case studies that are more detailed and complex than the incidents in the previous section and are more typical of the situations an AACD member may encounter. The case studies reflect the types of complaints that the Ethics Committee receives as well as the current and emerging concerns of the membership. Section 4 presents a series of essays intended to provide further information and provoke thought about ethical issues of particular concern to counselors. The appendices contain information to which the AACD member may need to refer from time to time, including: divisional codes of ethics; the ethical standards of the National Board for Certified Counselors; the AACD Policies and Procedures for Processing Complaints of Ethical Violations; and a description of the purpose and procedure of the AACD Legal Action Program. Counseling Ethics for the 21st Century prepares students to address ethical issues arising in contemporary counseling practice. Drawing on their own clinical and practical experiences, authors Elliot D. Cohen and Gale Spieler Cohen present detailed, realistic, and engaging clinical case studies along with a comprehensive five-step model that can be used to manage the complex ethical problems raised throughout the book. Each chapter focuses on particular virtues in the context of examining a particular counseling issue, including online counseling, digital record keeping, and social media. Students will be empowered to define problems, identify relevant facts, conduct ethical analyses, and make the best decisions for their clients.

Change the way you think about work (and life) by focusing on results—and only results Why Managing Sucks and How to Fix It shows how the Results-Only Work Environment (ROWE) mindset can make you or your organization more entrepreneurial, more connected with the broader trends in your industry, and more willing to take smart risks. It explains how to set clear expectations and focus on the endpoint as opposed to managing the process that gets you there. With eyes set on getting rid of distractions, long meetings, and unnecessary updates, this book offers quick, everyday strategies to experience huge increases in productivity (without adding resources) and dramatic drops in turnover. Authors Ressler and Thompson began their work together at Best Buy where they are credited with revolutionizing the workplace Reframes thinking away from counting on general availability (Where's Bob?) to creating clear expectations (Does Bob know exactly what's expected of him?) Explains how to reduce the number of meetings while increasing their quality Shows how to eliminate scheduled events in order to increase critical thinking and improve communication ROWE is a bold, cultural transformation that permeates the attitudes and operating style of an entire workplace, leveling the

playing field and giving people complete autonomy—to manage their measurable results using adult common sense.

Many counselors learn about ethics in graduate school by applying formal, step-by-step ethical decision-making models that require counselors to be aware of their values and refrain from imposing personal values that might harm clients. However, in the real world, counselors often make split-second ethical decisions based upon personal values. *Values and Ethics in Counseling* illustrates the ways in which ethical decisions are values—but more than that, it guides counselors through the process of examining their own values and analyzing how these values impact ethical decision making. Each chapter presents ethical decision making as what it is: a very personal, values-laden process, one that is most effectively illustrated through the real-life stories of counselors at various stages of professional development—from interns to seasoned clinicians—who made value-based decisions. Each story is followed by commentary from the author as well as analysis from the editors to contextualize the material and encourage reflection.

Lessons from the personal experience and reflections of a therapist. The difficulty and cost of training psychotherapists properly is well known. It is far easier to provide a series of classes while ignoring the more challenging personal components of training. Despite the fact that the therapist's self-insight, emotional maturity, and calm centeredness are critical for successful psychotherapy, rote knowledge and

technical skills are the focus of most training programs. As a result, the therapist's personal growth is either marginalized or ignored. *The Making of a Therapist* counters this trend by offering graduate students and beginning therapists a personal account of this important inner journey. Cozolino provides a unique look inside the mind and heart of an experienced therapist. Readers will find an exciting and privileged window into the experience of the therapist who, like themselves, is just starting out. In addition, *The Making of a Therapist* contains the practical advice, common-sense wisdom, and self-disclosure that practicing professionals have found to be the most helpful during their own training. The first part of the book, 'Getting Through Your First Sessions,' takes readers through the often-perilous days and weeks of conducting initial sessions with real clients. Cozolino addresses such basic concerns as: Do I need to be completely healthy myself before I can help others? What do I do if someone comes to me with an issue or problem I can't handle? What should I do if I have trouble listening to my clients? What if a client scares me? The second section of the book, 'Getting to Know Your Clients,' delves into the routine of therapy and the subsequent stages in which you continue to work with clients and help them. In this context, Cozolino presents the notion of the 'good enough' therapist, one who can surrender to his or her own imperfections while still guiding the therapeutic relationship to a positive outcome. The final section, 'Getting to Know Yourself,' goes to the core of the therapist's relation to him- or herself, addressing such issues as: How to turn your weaknesses into strengths, and how to deal with the complicated issues of pathological caretaking, countertransference, and self-care. Both an excellent introduction to the field as well as a valuable refresher for the experienced clinician, *The Making of a Therapist* offers readers the tools and insight that make the journey of becoming a therapist a rich and rewarding experience.

This current and comprehensive handbook will guide educators, students, and clinicians in developing the awareness, knowledge, and skills necessary to work effectively with LGBTQI+ populations. Twenty-five chapters written by experts in the field provide direction for working with clients in an authentic, ethical, and affirmative manner that is tailored to their individual strengths, needs, and identity. The book is divided into four sections, which explore the science behind gender and affectional orientation; developmental issues across the life span and treatment issues; the specialized needs of nine distinct populations; and the intersectionality of ethnicity and overlapping identities, the role of religion, and counselor advocacy. To further a deeper understanding of the content, each chapter contains an "Awareness of Attitudes and Beliefs Self-Check," a case narrative relating to the material covered, questions for discussion, and a list of online resources. The book concludes with an extensive glossary of terms, both preferred and problematic, which counselors working with these communities should understand and use appropriately. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org

"It is one thing to discuss these matters clearly and often, but it is another to make them living experiences for the reader. I am particularly impressed by the many ways in which the authors strive to involve the readers, whether it be by presenting dilemmas to consider or spelling out activities that highlight the points under consideration. This not only is a book that students will read with interest and enthusiasm, it also is one that will make the task of the instructor clear and easier to accomplish." - George Stricker, PhD, Argosy University

Each professional issue in counseling is approached from both an ethical and a legal point of view, offering readers a complete, integrated exploration of all facets, and the difficult issues are addressed in a straightforward manner. Practical, realistic advice is proffered through vignettes that showcase typical situations and dilemmas faced by practicing counselors. Additional revisions include: recent thoughts of multiculturalism in practice, types of advocacy and social justice in the field, new technologies in practice, plagiarism in counselor education programs and in scholarship, setting and maintaining boundaries with clients, thoughts and perspectives on making professional
