Founded in 1971, The Witches' Almanac is a witty, literate, and sophisticated publication that appeals to general readers as well as hard-core Wiccans. At one level, it is a pop reference that will fascinate anyone interested in folklore, mythology, and culture, but at another, it is the most sophisticated and wide-ranging annual guide available today for the mystic enthusiast. Modeled after the Old Farmers' Almanac, it includes information related to the annual moon calendar (weather forecasts and horoscopes), as well as legends, rituals, herbal secrets, mystic incantations, interviews, and many a curious tale of good and evil. Although it is an annual publication with about 15 percent of the content specific to the date range of each issue, there are pages and pages of interesting and timeless articles about Witchcraft/Wicca, magic, herbalism, charms, spells, and related topics. The theme of Issue 35 (Spring 2016 – Spring 2017) is air: the breath of life. Also included are articles on Lithuanian Day of the Dead, Nine Elements of the Druids, Tomb Sweeping Day, Kohl, and the Akashic Records. Energy and power are playing pivotal roles in social and economic developments of the modern world. Energy and power engineers and technologists have made our lives much more comfortable and

affordable. However, due to the demands of the global population on resources and the environment, innovations of more reliable and sustainable energy res

As new technology and opportunities emerge through the revolutionary impacts of the digital age, the function of libraries and librarians and how they provide services to constituents is rapidly changing. The impact of new technology touches everything from libraries' organizational structures, business models, and workflow processes, to position descriptions and the creation of new positions. As libraries are required to make operational adjustments to meet the growing technological demands of libraries' customer bases and provide these services, librarians must be flexible in adapting to this fast-moving environment. This volume shares the unique perspectives and experiences of librarians on the front lines of this technological transformation. The essays within provide details of both the practical applications of surviving, adapting, and growing when confronted with changing roles and responsibilities, as well as a big picture perspective of the changing roles impacting libraries and librarians. This book strives to be a valuable tool for librarians involved in public and technical services, digital humanities, virtual and augmented reality, government documents, information technology, and scholarly communication.

The global upswing in economic activity is strengthening. Global growth, which in 2016 was the weakest since the global financial crisis at 3.2 percent, is projected to rise to 3.6 percent in 2017 and to 3.7 percent in 2018. The growth forecasts for both 2017 and 2018 are 0.1 percentage point stronger compared with projections earlier this year. Broad-based upward revisions in the euro area, Japan, emerging

Asia, emerging Europe, and Russia—where growth outcomes in the first half of 2017 were better than expected—more than offset downward revisions for the United States and the United Kingdom. But the recovery is not complete: while the baseline outlook is strengthening, growth remains weak in many countries, and inflation is below target in most advanced economies. Commodity exporters, especially of fuel, are particularly hard hit as their adjustment to a sharp step down in foreign earnings continues. And while short-term risks are broadly balanced, medium-term risks are still tilted to the downside. The welcome cyclical pickup in global activity thus provides an ideal window of opportunity to tackle the key policy challenges—namely to boost potential output while ensuring its benefits are broadly shared, and to build resilience against downside risks. A renewed multilateral effort is also needed to tackle the common challenges of an integrated global economy.

Places, Towns and Townships is an excellent resource for anyone in need of data for all of the nation's cities, towns, townships, villages, and census-designated places in one convenient source. It compiles essential information about places in the United States and the people who live in them such as: • population • housing • income • education • employment • crime • and much more! In addition to the tables, Places, Towns and Townships includes text that describes key findings, figures that call attention to noteworthy trends in data, and rankings of the largest cities by various demographics. Compiled from multiple government sources, the data in this unique reference volume represents the most current and accurate information available. This data will not be updated for several years, making Places, Towns and Townships an invaluable resource in the years to come. Some interesting facts found in the 2016 edition of Places, Towns and Townships include: •

While about 18 percent of the population lived in the nation's 75 largest cities, 37 percent lived in places that were not incorporated as cities in 2014. • There were 34 incorporated cities and one town with more than 500,000 people in 2014. These 34 cities and towns represented only 23 states. • Among the 75 largest cities, Seattle, Boston, and San Francisco all have more than 72 percent of their residents in the 18-to-64 age group. • During the years 2010 through 2014, 13.1 percent of the residents of the United States were born in foreign countries. In 43 cities—mostly medium-sized cities and CDPs—more than half of the people are foreign-born. Many of these cities are in Florida. • In the five-year period from 2010 through 2014, 63.9 percent of Americans age 16 and older were in the civilian labor force, and 9.2 percent of the labor force participants were unemployed. • Nationally, Health Care and Social Assistance is the industrial sector with the most employees—16.6 percent of the total—followed by Retail Trade with 13.2 percent. Places, Towns and Townships makes a valuable addition to the County and City Extra Series.

Beyond 2020, wireless communication systems will have to support more than 1,000 times the traffic volume of today's systems. This extremely high traffic load is a major issue faced by 5G designers and researchers. This challenge will be met by a combination of parallel techniques that will use more spectrum more flexibly, realize higher spectral efficiency, and densify cells. Novel techniques and paradigms must be developed to meet these goals. The book addresses diverse key-point issues of next-generation wireless communications systems and identifies promising solutions. The book's core is

concentrated to techniques and methods belonging to what is generally called radio access network. This work is the only complete compilation of polls taken by the Gallup Organization, the world's most reliable and widely quoted research firm, in calendar year 2016. It is an invaluable tool for ascertaining the pulse of American public opinion as it evolves over the course of a given year, and—over time—documents changing public perceptions of crucial political, economic, and societal issues. It is a necessity for any social science research.
