Our lives are supposed to be resplendent, radiant, meaningful, and glorious. Instead what most of us experience is a life filled with struggles, conflict and illness. Relationshiping creates a bridge to a quantum wave guided living based upon Dr. Angela Longo's 50 years of TCM clinical experience. Dr. Longo offers an overview of the "eight bottom lines" which are the eight major ways in which we block the ability to live aware of quantum replendence. She explains how to shift that energy to resplendent living by relationshiping with many new tools of quantum wave living. The relationshiping mirror-call (miracle) includes explanations and exercises using the following tools: • Bathwaving is an easy to use technique for recognizing and shifting old, unproductive patterns to our desired ones. • BATHWAVE is an acronym for (Beliefs, Actions, Thoughts, Habits, Words, Attitudes, Values, Emotions) Helps us recognize forms of patterns. • Love letters are messages we are sending ourselves to guide us to living resplendently as symptoms, relationship patterns, dreams, daily events and creations. • Triunity shows that we are actually three beings in one nest— promoting understanding of our quantum existence. • Eternalbeing pattern helps us focus on who we really are. • Muscle testing helps us access our 'googleverse', perceptions and patterns. • Shifting the eight bottom lines and our five element BATHWAVEs transforming our glow to living resplendently. Relationshiping demonstrates the fact that when you are living in the resplendent way, living is EEEZY— An Eternal, Emergent, Entanglement as a Zestful You.

Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her

husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences. *Give Me Liberty!* is the #1 book in the U.S. history survey course because it works in the classroom. A searing novel of social realism, Upton Sinclair's *The Jungle* follows the fortunes of Jurgis Rudkus, an immigrant who finds in the stockyards of turn-of-the-century Chicago a ruthless system that degrades and impoverishes him, and an industry whose filthy practices contaminate the meat it processes. From the stench of the killing-beds to the horrors of the fertilizer-works, the appalling conditions in which Jurgis works are described in intense detail by an author bent on social reform. So powerful was the book's message that it caught the eye of President Theodore Roosevelt and led to changes to the food hygiene laws. In his Introduction to this new edition, Russ Castronovo highlights the aesthetic concerns that were central to Sinclair's aspirations, examining the relationship between history and historical fiction, and between the documentary impulse and literary narrative. As he examines the book's disputed status as novel (it is propaganda or literature?), he reveals why Sinclair's message-driven fiction has relevance to literary and historical matters today, now more than a hundred years after the novel first appeared in print.
