This book is written for K-12 teachers and educators to understand the school experiences and life journeys of the English Language Learners (ELLs) through four Chinese ELLs by documenting their transitional experiences into an American school.

Traditionally, Chinese students are perceived as the model minority in American schools who are academically successful. Yet, this book provides a new perspective by documenting the life journey and school experiences of the four Chinese ELLs. The book gives a detailed account of the four ELLs in transition from Chinese language and culture into American school and culture. Interview, observation, and documentary data at their homes and American school reflect this transitional journey. The book helps K-12 teachers and educators understand that Chinese students also come from different family backgrounds and have different previous schooling experiences. This will help teachers and educators better working with Chinese and all ELLs who adapt the new school environment. This book is reader-friendly and carefully crafted with six chapters. Each chapter focuses on one Chinese ELL with genuine research data. The book begins with an introduction to provide basic information of the four ELLs and concludes with the final chapter that provides an update on the ELL students. This book can also be used as reading texts by college students in teacher education and training programs. The book is targeted for the TESOL organizations. The TESOL has one of the largest memberships with over 12,000 members representing 156 countries (TESOL Brochure, 2017). This book also benefits various attendees of professional education conferences.

This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

For those who seeks a career in Research/ Lectureship in English Literature from the foremost reputed colleges and Universities of the country, UGC NET English may fulfill you dreams.
