This best-selling series is a favorite of parents and teachers because it is carefully designed to be both effective and engagingÑthe perfect building blocks for a lifetime of learning.

An innovative instructional solution that develops students' understanding of the Common Core State Standards in an interactive format while addressing the Standards for Mathematical Practice.

The Upside-Down Magic kids are back in another topsy-turvy adventure in the next installment of this New York Times bestselling series! It's Big Night in Dunwiddle . . . and that means the whole school has a sleepover like no other. For one night every year, magic students run through the halls, hunting for the objects that will win them a super special prize. Nory is super excited for the scavenger hunt. Not only because she likes winning, but also because if her team wins, she thinks there's a chance her best friend Elliott won't move away to attend super snobby Sage Academy. Sebastian is a little less excited once the hunt is on. Yes, he has magical powers that help his team -- like being able to see invisible things or anything that makes a sound. The problem is that the really loud sounds are hurting him . . . and nobody seems to care. The kids in Upside-Down Magic know their five F's (Flares, Flyers, Fuzzies, Flickers, and Fluxers) -- but to win this night, a sixth F is the most important . . . Friendship.

GO Math! incorporates the latest thinking in its comprehensive approach and engages digital natives with cross-platform technology. It helps teachers to differentiate instruction, building and reinforcing foundational math skills that translate from the classroom to real life.
