Beautiful People, a fast moving story that carries us across continents. It is a story of two families totally unknown to each other and coming from separate cultures. It is the tale of how their fortunes came to cross paths in the High Himalay and the dusty plains of North India. The story carries us over a period of almost two decades and tells us of the varying fortunes of our two families whose second generation comes together as students in the Eastern hill station of Darjeeling the famed tea producing centre. The underlying current of terrorism and the activities of the crime nexuses brings us back to the stark realities of the present day world where none are truly secure and can never know when violence may strike. The devious minds of the terror-crime nexux and their objectives run as an under current throughout the story which finally ends in the bustling capital of India Delhi Pradeep Swar a young and promising young Nepali author wrote this story at the tender age of 16. He himself was a student in Darjeeling has used much of his own personal experience of the region to give depth and interest to his first full length novel.

Written by a 15-year-old high schooler, Astrophysics Simplified: A Simple Guide to the Universe is inspired by books like A Brief History of Time and Astrophysics for People in a Hurry. This is a popular science (science for a general audience) book. It mainly focuses on the major developments in science by Aristotle and Ptolemy to physicists like Stephen Hawking and Richard Muller. The various concepts of physics, like relativity and quantum physics, are explained in this book along with various topics in astrophysics and cosmology. There is limited mathematics in this book, but some major equations are included. I have done so because one cannot grasp the true 'beauty' in physics without seeing the mathematical or abstract parts alongside practical laws. Physics is to mathematics what Tony Stark (Iron Man) is to J.A.R.V.I.S. or F.R.I.D.A.Y. The groundwork of computations, statistics, simulations etc. is done by F.R.I.D.A.Y. But, the real work of fighting the villains is done by Iron Man.

Surgery is a core element of the clinical practice of gynaecology. Bonney's Gynaecological Surgery has been a firm favourite for gynaecological surgical practice since 1911. Specifically tailored for trainees in obstetrics and gynaecology, the text focuses on the most commonly performed procedures. The 12th edition will include a colour photo section. With greater emphasis on fundamental clinical skills and major updates on laparoscopic and robotic surgery, this classic text will be brought right up to date for the current trainee or junior consultant physician. Each chapter follows a consistent plan, guiding the reader through each procedure from anatomy and indications to post-op considerations and complications. The text is also accompanied by surgical illustrations of unparalleled quality, ensuring that this volume will remain a valuable resource for all clinicians specializing in gynaecological surgery.

Saraswati Health and Physical Education is a much acclaimed and popular series in Health and Physical Education.
