For a healing system that has been practiced for 1,300 years, Tibetan medicine is surprisingly contemporary in its assumptions. Under the guidance of skilled lama-physicians, it views good health as a balance between material and spiritual concerns and marshals an impressive array of physical, psychological, and spiritual practices in its extensive medical kit. To explore the modern legacy of the Medicine Buddha tradition, Peter Fenton journeyed to India and Nepal to see first-hand how Tibetan medicine is practiced today and to discover whether its ancient secrets can help us improve our own well-being. His first-person account, full of fascinating stories and interviews and illustrated with photographs, charts, and botanical drawings, demonstrates that traditional Tibetan healing is a vibrant, living system that can help each of us rebalance body, mind, and spirit--the essence of good health.

An introduction to the ancient Kung Fu practice designed to unify physical, mental, and spiritual health • Describes the unique Iron Shirt air-packing techniques that protect vital organs from injuries • Explains the rooting practice exercises necessary to stabilize and center oneself • Includes guidelines for building an Iron Shirt Chi Kung daily practice
Long before the advent of firearms, Iron Shirt Chi Kung, a form of Kung Fu, built powerful bodies able to withstand hand-to-hand combat. Even then, however, martial use was only one aspect of Iron Shirt Chi Kung, and today its other aspects remain vitally significant for anyone seeking better health, a sound mind, and spiritual growth. In Iron Shirt Chi Kung Master Mantak Chia introduces this ancient practice that strengthens the internal organs, establishes roots to the

earth's energy, and unifies physical, mental, and spiritual health. Through a unique system of breathing exercises, he demonstrates how to permanently pack concentrated air into the connective tissues (the fasciae) surrounding vital organs, making them nearly impervious to injuries--a great benefit to athletes and other performers. He shows readers how once they root themselves in the earth they can direct its gravitational and healing power throughout their bone structure. Additionally, Master Chia presents postural forms, muscle-tendon meridians, and guidelines for developing a daily practice routine. After becoming rooted and responsive, practitioners of Iron Shirt Chi Kung can then focus on higher spiritual work.

"Each morning before getting out of bed, Dr. Yang practices a series of movements he has combined based on decades of experience. Follow along and learn how a unique combination of simple yog stretches, qigong movements, and acupressure techniques can relieve energy stagnation (aiding those suffering from insomnia, back pain and low energy) and rejuvenate your entire body. All the exercises can be performed lying down or sitting, if preferred. Meridian qigong will quickly improve your general health, helping you to heal and preventing injuries"--

The book examines one of the world's most enduring and influential literary works, the Dao De Jing, through the timeless art of qigong, investigating the original text's relevance for mental, spiritual and physical health practices. In his words, Lao Tzu (or Laozi), author of the Dao De Jing, embodies qigong principles, advocating the cultivation of mind and body. Only when we know qigong can we know Lao Tzu-- and only when we know Lao Tzu can we know the Dao De Jing.--Publisher.

This ancient ritual enabled me to enter a supernal realm, a tangible place of living myth and primordial power. Here, suspended for a time in a lost world, I took nothing for granted. Everything became possible. The patterns of my everyday life were dislodged in the immediacy of previously unknown and utterly overwhelming natural forces. Sounds, images, symbols, and scents from a bygone era took command of my senses. Songs were sung in unfamiliar rhythms. Prayers were spoken in an unfamiliar language. In the heat and steam and integrity of it all, an inner vision awakened. My task was to learn to use it to navigate this exotic and sometimes foreboding territory. Over time, it became clear that the setting and instruments of the ritual are tools. Through generations of use, these devices had become lifelines. The rattle, the drum, the incense, the prayers all were a means to reveal the ancient ideas still living within the ceremony. Message from Earth is the story of what I discovered in the ritual sweat lodge. of Shaolin Temple qi gong and kung fu in the 6th century CE. Motivated by the terrible physical condition of the monks who spent all their time meditating or copying scrolls, his two-part system promoted physical as well as spiritual fitness and became the basis for all the martial and meditative arts taught in the Shaolin Temple. These ancient practices increase physical health and vitality, enhance creativity, and can be practiced well into old age. Author Shi Xinggui, a Shaolin monk, explains the fundamental principle of qi gong--the art of mastering energy (qi) and moving it through the body--and provides clear demonstrations of all the positions and movements. In order to develop qi attentively, it is necessary to cultivate the art of slowness in both movement and breathwork. Shi Xinggui provides both a short form and a long form of the daily exercises, with lessons on heart centering, organ strengthening, and balancing the energy using the three dantians--the three energy centers of the body.

In many old martial arts films you often see a master capable of extraordinary supernormal feats such as being able to move with the speed of wind, throw incredibly heavy objects, destroy them with a strike, stride over water, or even fly through the air. Are such things possible? The Chinese Taoists say "yes" if the master practiced special exercises to cultivate their inner energy, or yang chi (qi). These practices to cultivate inner power are called nei-gong, or the internal martial arts, and are related to the mastery of the kundalini energies cited in Indian yogic and Buddhist literature, which also explains the various superpowers that become possible with its cultivation. Many people today want to be able to attain such supernormal skills, or they

simply want to understand why and how these skills were cultivated so they might be duplicated as best possible. Some practitioners of Tai Chi Chuan, Hsing-Yi, Ba Gua Zhang, Five Animals, Aikido, Karate, Judo, Northern Shaolin, and other Kung Fu Wushu traditions have alternatively damaged their bodies from their practice, or have reached a training plateau, and want some sure methods to break their current limits and bring their martial arts skills to the next level. This book explains the major practices on how to properly cultivate nei-gong safely to achieve all these objectives. The information provided, because of its advance nature, was usually considered the high "secrets" of martial arts lineages made available only to the top students who also practiced breathing methods and meditation. It explains how to cultivate the mythical martial arts through the initial practice of qi-gong, and then inner nei-gong exercises involving anapana, pranayama, one-pointed visualization, kasina meditations, and sexual cultivation. It provides training information applicable to Iron Palm, Iron Shirt or Dim Mak techniques, which though incredible in themselves still fall far short of the special supernormal achievements possible after a martial arts student successfully opens up their chakras and chi channels, in particular their sushumna central channel and the macrocosmic chi circulation within the body. This is the only book in English offering detailed instructions on how to cultivate the Taoist concept of shen, which is the stage of awareness attained after cultivating your chi to a high level. For purposes of attaining inner gong-fu (kung fu), it also teaches how to

cultivate the Six Yogas of Naropa and the Tibetan tantric mantras for opening up the body's central chi channel. In terms of specific long term nei-gong methods, it stresses visualization and anapana practices which are explained in conjunction with more advanced techniques for dissolving inner energy blockages. Rather than just focusing on internal martial arts kung fu, the authors go even a step further also bring forth many rarely discussed modern training principles for peak athletic performance that can be applied to martial arts, and provide practical information on various vitamin-mineral supplements, detoxification routines, and bodywork therapies that can help heal martial arts injuries and lead to improved skills even if the nei-gong route of internal martial arts energies and gong-fu is not mastered. This is a truly unique book, quite different than what's normally available for the martial arts tradition, because it provides full materials on topics rarely covered elsewhere, and reveals not one, two or three but a plethora of inner training practices, even for qi-gong, along with what are normally considered their secret training details.

and Johnathon Dao share the legends of each Immortal teacher and detail the many ways to apply their wisdom through nutrition, exercises, supplements, detoxification methods, spiritual practices, and energy work. They explain how the first Immortal, born during the 8th century AD, is associated with oxygen, considered in the Taoist healing perspective as the body's primary nutrient. They discuss how oxygen deficiency is the main culprit in cancer and virus and provide a number of oxygen therapies including the use of hydrogen peroxide and deep breathing to stimulate the metabolism and immune system. The second Immortal Healer centers on water, and the authors explain how chronic dehydration can lead to a host of ailments and offer advice for rehydrating. The other teachings of the Immortal Healers include Nutrition, with guidance on supplements, superfoods, toxic foods, and daily meals; Detoxification, with detailed guidelines for cleansing the body's organs and glands; Avoiding environmental poisons, with advice on vaccines, dental amalgam fillings, sunscreen, chemotherapy, fluoride, and pesticides; Exercise, with step-by-step instructions for Inner Alchemy practices, yoga, and breathing techniques; Maintenance of the energy body, through acupuncture, chi kung healing, magnet therapy, and photon sound beams; and Emotional pollution and spiritual hygiene, with a wealth of practices for balancing the emotional body and staying connected to Source, including forgiveness, meditation, and karmic yoga. Dr. Liu describes how he risked his life under the Communist regime in China to study Qi Gong and meet secretly with a master who lived in a mountain cave above Shanghai. If there is one concept that comes up in all forms of Chinese medicine it is that of Qi, or vital energy. Qi is the very backbone of the Chinese healing arts. It refers to the energy of the universe that is channeled from nature and runs through all of us. To have Qi is to be alive, while to have none is to be dead. Qi Gong relies on the manipulation of this vital energy, and Qi Gong masters can see this energy. This book explores the basics of Qi Gong to create a guide for greater health, the Chinese way.

A guide to nourishing the body through bone marrow rejuvenation exercises • Presents exercises to “regrow” bone marrow, revive the internal organs, and prevent osteoporosis • Explains the use of bone breathing and bone compression, “hitting” to detoxify the body, and sexual energy massage and chi weight lifting to enhance the life force within Most Westerners believe that a daily physical exercise program helps slow the aging process. Yet those whose bodies appear most physically fit on the outside often enjoy only the same life span as the average nonathletic person. It is the internal organs and glands that nourish every function of the body, and it is the bone marrow that nourishes and rejuvenates the organs and glands through the production of blood. By focusing only on the muscles without cultivating the internal organs, bones, and blood, the Western fitness

regimen can ultimately exhaust the internal system. In Bone Marrow Nei Kung Master Mantak Chia reveals the ancient mental and physical Taoist techniques used to “regrow” bone marrow, strengthen the bones, and rejuvenate the organs and glands. An advanced practice of Iron Shirt Chi Kung, Bone Marrow Nei Kung was developed as a way to attain the “steel body” coveted in the fields of Chinese medicine and martial arts. This method of absorbing energy into the bones revives the bone marrow and reverses the effects of aging through the techniques of bone breathing, bone compression, and sexual energy massage, which stimulates the hormonal production that helps prevent osteoporosis. Also included is extensive information on chi weight lifting and the practice of “hitting” to detoxify the body. There's more than enough modern literature about the subject. There are thick books about the history and evolution of this technique, there are general introductory books and deep insights into almost any of the branches of Qi Gong, descriptions of all possible special exercises. But most of them are either too voluminous or they are much too specialised to may provide a good overview and, at the same time, a first contact with Qi. With this book, I try my best to offer you both of them in a compact form, devoid of any religious or esoteric ideas.

and the flow of chi • Explains how to release energetic blockages and emotional and physiological knots, activate the energetic pumps of the 3 tan tiens, and tap in to the Cosmic Flow Exploring the connections between Western craniosacral therapy and Chi Kung, Taoist master Mantak Chia and craniosacral instructor Joyce Thom detail movement exercises, breathwork practices, self-massage techniques, and focused meditations from Taoist and other wisdom traditions to release and harmonize the flow of energy in the body and optimize our potential for physical, emotional, and spiritual well-being. The authors link the craniosacral rhythm--the gentle flow of cerebrospinal fluid from the head (cranium) to the tailbone (sacrum)--and the flow of chi throughout the body, circulated by the pumps of the three tan tiens. They explain how these subtle energetic flows indicate the harmony or disharmony of the whole person and are greatly affected by physical traumas, chronic tensions, and unresolved emotions. For example, the psoas muscle, known in Taoism as the muscle of the Soul, connects the spine to the legs and is the first muscle to contract when anger or fear triggers our fight-or-flight response. Often a storehouse of subconscious stressors, this muscle's sensitivity is connected to many common ailments like back pain. Providing step-by-step illustrated exercise instructions, the authors explain how to identify and unwind energetic blockages and emotional and physiological knots. They explore emotional intelligence exercises for tuning in to our hearts so we can listen to our bodies' messages and learn to relieve related emotional burdens. They also reveal how to activate the cranial, respiratory/cardiac, and sacral pumps of the three tan tiens to optimize the body's energetic flow and explain how, when our energy is flowing freely, we can enter the Cosmic Flow--a state of calm well-being and extraordinary creativity where we find ourselves truly at one with the

This book belongs in every martial artist's library, as the Eighteen Lohan Skills are a foundational system for the development of kung fu—not only traditional Shaolin Temple Kung Fu, but for nearly all martial art systems created thereafter. This is true in the applications and functions of the exercises, and in posture names as well. No full translation or serious presentation of these exercises exists in English—until now! In presenting these teachings, Stuart Alve Olson made exclusive use of the original Chinese text by Praying Mantis Kung Fu master Fan Xudong and the later publication Lohan Gong, detailing the exercises by Master Wong Honfan. Included are the original illustrations from Fan Xudong's work and the photographs of Master Wong Honfan performing the exercises. The second section shows the original Shaolin text of these exercises with illustrations. The third section of the book presents the actual eighteen Lohan figures for which the exercises are named, providing a deeper spiritual outlook on the practice of kung fu and meditation. Through its yoga-like stretching aspects, the Eighteen Lohan Skills are not only a qigong practice (combining breathing with body movements), they also train martial applications, and promote internal alchemy skills because they stimulate and develop the internal energies of jing (body/essence), qi (breath/vitality), and shen (mind/spirit). The Eighteen Lohan Skills, then, are a complete system for health, longevity, and spiritual development. This book is a necessity for martial artists, qigong practitioners, and even those who follow Buddhist meditation practices and philosophy.

This form of Qi Gong was developed by Shaolin priests and brought to the West from Beijing in the mid-1980s. It is an ancient Chinese discipline with links to Martial Arts and Chinese medicine.

They found six sounds with the correct frequencies to keep each organ in optimal condition. To accompany these Six Healing Sounds, six postures were developed to activate the acupuncture meridians, or energy channels, of the corresponding organs. In The Six Healing Sounds Master Mantak Chia explains how the pressures of modern life can cause excess heat to become

components of ch'i, and how learning to control the yang energy in our ch'i can result in the release of dynamic energy. • Establishes the existence and understanding of nei kung in the practices of many of the world's ancient cultures. • Includes a step-by-step guide to the meditation that forms the basis of the practice of nei kung. • By Kosta Danaos, author of *The Magus of Java* and apprentice to an immortal of the Mo-Pai tradition. In 1994 Kosta Danaos was accepted as a student by John Chang, a Chinese-Javanese Taoist in the Mo-Pai tradition and a master of nei kung, the practice of harnessing and controlling our body's bioenergy, or ch'i. *Nei Kung: The Secret Teachings of the Warrior Sages* describes the practice of nei kung and how learning to control our ch'i can result in the release of dynamic energy that can be used for healing, pyrogenesis, telekinesis, levitation, telepathy, and more. Danaos suggests that both components of ch'i--yin and yang energy--are fundamental to the earth and to life and were recognized and used in many of the world's ancient cultures. Though we have forgotten how to access them, these components are in fact elemental parts of us. The author explains that we first must open our minds to the fact that the power of ch'i is real. Next, in learning to control our ch'i as a whole, we must learn to channel our yang energy in productive ways--a potential we all possess. To help readers understand

their capacity to connect with this inner elemental power, the author offers a fascinating blend of teachings that include sound scientific theories explaining much of the "magic" of nei kung. He also offers historical, linguistic, artistic, and literary proof of the presence and understanding of nei kung throughout the ages and a step-by-step introduction to several types of simple meditation--fundamental to directing one's ch'i. With his engaging storytelling and disarming humor, his physics-based explanations for seemingly mystical phenomena, and his reassurances that he's really no different from the rest of us, Kosta Danaos shows us that once we remember our capacity to harness our yang energy, we can change ourselves and our world. Today as in the ancient time special exercises aimed at acquiring "Internal Mastery"(GONG FU) are one of the most important elements of Shaolin monks training. Those exercises is the core of the Shaolin martial training, they are the key to the true summit of mastery. An old proverb says: "If you exercise only the technique (style) but ignore special training you will be a nobody till your old days." "Special training" implies particular exercises for developing both WAI ZHUANG - "the External Power" and NEI ZHUANG - "the Internal Power." Those exercises (training procedures) are collected under a common title - LIAN GONG, literally "Exercising to Acquire Mastery."

The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal. Feng shui is a deeply-entrenched, three-millennia-old system of Asian beliefs and practices about nature, architecture, health, and divination that has garnered a growing presence outside of Asia. It is part of a comprehensive and ancient worldview built around belief in chi (qi) the putative universal energy or life-force that animates all existence, the cosmos, the solar system, the earth, and human bodies. Harmonious living requires building in accord with local chi streams; good health requires replenishment and manipulation of internal chi flow; and a beneficent afterlife is enhanced when buried in conformity with chi directions. Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture, tai-chi and qigong exercise, and herbal dietary supplements. Matthews has produced another tour de force that will repay close study by students, scientists, and all those concerned to understand science, culture, and the science/culture nexus. Harvey Siegel, Philosophy, University of Miami, USA With great erudition and even greater fluidity of style, Matthews introduces us to this now-world-wide belief system. Michael Ruse, Philosophy, Florida State University, USA The book
