As a trader, you have to come up with various strategies in order for you to ensure that you do not make losses when buying and selling stocks. You must be in a position to predict how the market will be in the near future. This will give you an insight into whether you should invest your money in the stock market or not. You will be required to analyze all the technical indicators in order for you to be able to tell whether the stock prices will go up or not. The difference between day traders and swing traders is that the day traders monitor all the price movements in the stock in order for them to be able to tell whether they should buy or sell their stocks. The swing traders are, however, never interested in the prices of

the stocks at any given time. This means that they can trade at any given time. Their interest is the long-term benefits they get from the stock market. The swing trader will invest their money in a hurry and expect to get returns quickly. They may be lucky to make profits at times, but they may also be unlucky to make losses. With swing trading, one has to be a risk-taker to indulge in it. This means that they should be ready for losses, even as they make profits. However, they can make sure that they know where their support comes from. They should also be able to identify their resistance levels through the use of technical analysis. This will be of great help in ensuring that they are excellent traders. Most traders do not like swing trading. This is because it is said to be riskier. It is risky since the trader's interest is on the profits they make as they close the stocks. This means that they can either make profits or losses since the market is not predictable. They may find themselves getting shocked as a result of a change in the economy hence change in the prices in the market. The interest rates would be too high, which will make them get losses. Who would want to be in a situation where they make losses after investing all their money in the stock market? No one would want that to happen to them. We all look forward to better days. We want to make profits and expand reinvest again. It is therefore important for one to ensure that they take their time before investing in the market in order for them to ensure that they minimize the chances of making losses. Swing trading is gaining popularity as a powerful method to increase returns—and potentially lower risks—by profiting from short-term price moves. The Master Swing Trader explains how traders can use technical analysis, charting, and market sentiment to make trades that hold through price fluctuations and noise with wider stops. This complete, practical guide to making profitable short-term trades—based on the author's popular "Mastering the Trade" online course—uses dozens of charts and graphs to illustrate proven swing trading concepts and strategies. Experienced day, position, and online traders will benefit immediately from:

- The 7 Bells – unique tools to uncover promising short-term prospects
- Techniques to profit from low-risk short sales
- The 4 repeating cycles for perfectly timed trades

There are two major ways to consistently make money in the market: 1) Hunt for several huge winners in a year. Build large positions in them and ride them for monstrous gains. 2) Hunt for hundreds of 5% to 30% short-term winners, where the goal is to compound capital quickly by actively moving in and out of them. There is not right or wrong approach here. Both have place in the arsenal of each active market participant. Everything comes at a price. If you want to catch a 200% to 300% long-term winner, you have to be willing to sit through multiple consolidations and several bigger than 30% pullbacks. Not everyone has the stomach to ride big stock market gainers, but maybe you don't have to. If you sell all your winners, when they are up 20%, you will never catch a double or a triple. Fact. What is also true is that in any given year, there are a lot more 20% moves than 100% moves. If you learn how to catch hundreds of quick 5% to 20% moves, your capital could appreciate very quickly while you keep you keep the drawdown in your account to a minimum. Swing trading is among the fastest way to grow capital if you learn how to properly apply its principles. Swing trading is all about velocity and opportunity cost of capital. The goal is to stay in stocks that are moving quickly in our favor and avoid "dead money" periods. Stocks move in 5% to 30% momentum bursts that last between 2 and 10 days, before they mean-revert or go into sideways consolidation. The goal of every swing trader is to capture a portion of a short-term momentum burst, while avoiding consolidation periods. Then to repeat the same process hundreds of times in the year by risking between 0.5% and 1% of capital per idea. The beauty of swing trading is that it provides many signals. You don't need to risk a lot

per signal. You won't second-guess yourself whether to take a signal or not. One trade is not going to make your year or your month, but it also won't ruin it. It relies on the magic of compounding. The idea is to grow capital quickly by being leveraged to the hilt during favorable periods and being mostly in cash during unfavorable periods. I know that if you apply the principles I describe in this book, you will become more knowledgeable, more profitable and happier market participant. Here is a brief overview of what you could expect to learn: 1) What drives short-term market moves? How to recognize perfect swing setups; when to buy them and where to put your stop losses. 2) When to sell and how. 3) How to be more profitable. How to improve your success rate and where to hunt for big short-term gainers. 4) How to manage risk properly. How to decide how many shares you should buy of every stock you like. How to check if you have an edge in the market. 5) How and why to time your market exposure. The paper version of the book is super thin, because of its huge dimensions of 8"x10." 84 pages with about 30 colored charts with annotations. Letters size is 14 with 1.5 spacing. It could be read in one sitting. There is no fluff. Only practical, actionable information that could be applied right away. Here are some brief reviews from Twitter and StockTwits: @BarbarianCap .
