Los Zetas represent a new generation of ruthless, sadistic pragmatists in Mexico and Central America who are impelling a tectonic shift among drug trafficking organizations in the Americas. Mexico's marines have taken down the cartel's top leaders; nevertheless, these capos and their desperados have forever altered how criminal business is conducted in the Western Hemisphere. This narrative brings an unprecedented level of detail in describing how Los Zetas became Mexico's most diabolical criminal organization before suffering severe losses. In their heyday, Los Zetas controlled networks of American police, politicians, judges, and businessmen. The Mexican government is losing its "war on drugs," despite the military, technical, and intelligence resources provided by its northern neighbor. Subcontracted street gangs operate in hundreds of US cities, purchasing weapons, delivering product, executing targeted foes, and bribing the US Border Patrol. Despite crippling losses Los Zetas still dominate Nuevo Laredo, the major portal for legal and illegal bilateral commerce. They also work hand-in-glove with the underworld in Guatemala, El Salvador, and Honduras, as well as with gangs like the Maras Salvatruchas.

Fun novelty notebook Small / journal / notebook to write in, for creative writing, planning and organizing. Would make a perfect gift for Birthday and Christmas Perfect Size at 6" by 9" 100 pages Softcover bookbinding Flexible paperback A major 2007 study of the impact of Home Rule on liberalism and popular radicalism in Britain and Ireland. Eugenio Biagini argues that between 1876 and 1906 the crisis of public conscience caused by the Home Rule debate acted as the main catalyst in the remaking of popular radicalism. This was not only because of Ireland's intrinsic importance but also because the 'Irish cause' came to be identified with democracy, constitutional freedoms and humanitarianism. The related politics of emotionalism did not aid in finding a solution to either the Home Rule or the Ulster problem but it did create a popular culture of human rights based on the conviction that, ultimately, politics should be guided by non-negotiable moral imperatives. Adopting a comparative perspective, this book explores the common ground between Irish and British democracy and makes a significant contribution to the history of human rights, imperialism and Victorian political culture.

Tom Bolton's account of how Harry Ferguson and his inventions changed the world of farming forever.

From Allis-Chalmers to Vickers, here is an A-Z of tractors made in Britain between 1945 and 1965, written by a universally acknowledged expert in the subject, whose work has been widely published in books and magazines. British Tractors deals with the products of not only British manufacturers such as David Brown, Ferguson and Nuffield, but also the American makers who established plants in Britain to overcome postwar import restrictions, which included

International Harvester, Massey-Harris and Minneapolis-Moline. Demand for tractors after the War was insatiable, and the period covered saw extraordinary growth in production and innovation in design. The text is illustrated exclusively with images - some 400 in all - from the manufacturers' sales brochures and publicity material, giving a unique flavour of the times and an impression of the features the manufacturers were highlighting in the promotion of their tractors.

In Simple Kabbalah, journalist and Jewish scholar Kim Zetter outlines the history of this mystic tradition, the main tenets of its belief system, and explains its central symbol, the Tree of Life. She then shows how to practice the wisdom of Kabbalah in everyday life through meditation and exercises for calming the mind and sharpening awareness. As we gradually absorb this ancient form of knowledge, we see how it affects every aspect of our lives, from attitudes about work and the environment to our social and personal interactions. Despite its popularity at cocktail parties and in the media, few people genuinely understand what Kabbalah is. Unlike traditional Judaism, Kabbalah views God as a divine source of light, energy, and love, ever present in the physical world, rather than a patriarchal deity. Kabbalah practitioners look beyond a literal interpretation of the Hebrew Bible for information about the soul; the nature of God, Creation, and the spiritual world; and humans' relationship to God and to each other.

This book explores the conditions under which Nuclear Weapons Free Zones (NWFZs) can be established. It analyzes four hypotheses that explain the factors contributing to the formation of NWFZs, building upon realist, constructivist and liberal theories from international relations. Through structured focused comparison, the book presents and compares the emergence of NWFZs in Latin America, the South Pacific, Southeast Asia, Africa, Central Asia, and the Middle East, which is a prospect for a NWFZ. The book argues that NWFZ projects depend on the following conditions: the security interest of regional states in avoiding nuclear threats, preexisting regional institutions and regional economic cooperation, leadership by a core of regional powers and shared interest in spreading non-proliferation norms. Democracy is not a

necessary condition, but democratization can help overcome barriers presented by hesitant or opposed regional governments. As too many of the mentioned necessary conditions are lacking in the Middle East, a NWFZ project, thus, will be possible only after major political changes. This book will be of much interest to students of nuclear proliferation, arms control, security studies and International Relations. Harry Ferguson's contribution to agriculture was enormous. His Ferguson System took farm mechanisation a giant leap forward and was universally copied by other manufacturers. Indeed it remains a basic feature of tractor and implement design worldwide today. He was also an innovator in offering in addition to his tractor a complete range of implements designed specifically for it, from ploughs to post-hole borer, something no manufacturer had done before, and a strategy that greatly increased sales of Ferguson products. He really knew how to sell, and in addition he outdid all his competitors in the promotion and marketing of the Ferguson range. This book brings together a wide selection of Ferguson advertisements published in journals and magazines in both the UK and the USA, from the days of the Ferguson Brown tractor through the Ford Ferguson, TE20, TO20, TO30, TO35 and Ferguson FE35 to the Ferguson 40, the last of the line prior to the introduction of the Massey-Ferguson MF35. Implements and farm equipment made for Fergusons are also covered. Author John Farnworth is well known through his previous publications, and here he studies a subject that has a broad appeal to tractor enthusiasts and to the army of collectors of Ferguson memorabilia, while at the same time providing an overview of the life and times of the Ferguson brand. More than 000 advertisements are reproduced in the book.
